THE COUNCIL FOR TOBACCO RESEARCH – U.S.A., INC.

January 18, 1973

5

Reject

Grant Application No. 896

To: The committee comprising Drs. Andervont, Gardner, and Huebner

Subject: Joel Warren, Ph.D., Director, Leo Goodwin Institute for Cancer Research, Fort Lauderdale, Florida
New application No. 896
"Potentiation of Herpesvirus by Tobacco Tar Condensates"

History

This project was Case No. 86, and full application was encouraged.

Application No. 896 requests $22,994 for one year, with "option of extension" for unspecified amounts.

Documents Submitted (attached)

1. Letter to Dr. Hockett dated January 15, 1973
2. Application dated January 12, 1973.
3. Final report to U. S. Department of Agriculture, December 31, 1972. (Although not marked "confidential", we should doubtless so regard it as it is a report on a contract).

(Also submitted were several reprints and a manuscript which appear not to be relevant, and are not cited under "References" in the application.)

Comment

The statement on "Facilities", item 9 of the application, explains why the name of the institution has changed since receipt of the inquiry which became Case No. 86.

This program appears to be an outgrowth of that of the late Dr. James Reyniers.
